HIGHLIGHT

Best selling Udemy instructor, React & TypeScript — deployed via Udemy Business at Nike, Vimeo, Fender, Volkswagen.

LANGUAGES

FRENCH native

ENGLISH fluent

INTERESTS

- Building mobile apps, AI, side SaaS projects.
- Padel — actively looking for a partner

EXPERIENCE

TECH LEAD / DEV LEAD

Garance — Klemo, Paris / Apr 2025 — Now

Tech Lead on Klemo, Garance's AI-powered investment app. Owns the technical architecture, leads a team of engineers, and designs applied-AI features for personal finance, within a regulated framework (ORIAS, AMF, ACPR).

FULL-STACK ENGINEER

Clone, Paris / Feb 2024 — Apr 2025

Full-stack development in food-tech: built an order aggregator across UberEats, Deliveroo and Foodora for restaurant partners. Shape Up methodology, end-to-end testing with Playwright.

LEAD DEV FULL-STACK/ TRAINER

Kernl, Tours / Jun 2023 — Feb 2024

Built a concierge-management SaaS end to end. Led front-end development, functional analysis and specification writing.

LEAD DEV

Ifeelsmart, Paris / Jan 2022 — Jun 2023

Tech Lead on the front-end of a Netflix-style VOD platform: live streaming, targeted ads, multi-platform support. Owned technical direction and support across TV and web teams.

FULL-STACK ENGINEER

Ideel, Paris / May 2021 — Jan 2022

Full-stack development of a mobile app for subscription management and optimization.

LEAD FRONT-END DEV

Yugo Flights, Cambodia / Apr 2020 — Apr 2021

Flight-booking platform (helicopters and jets). Full ownership as Tech Lead of architecture, support, testing and deployment.

LEAD FRONT-END DEV

CGI, Montreal / Sep 2017 — Mar 2020

User-management and e-commerce app for Vidéotron, on a 50-engineer project. Set architecture direction and established CI/CD tooling.

FULL-STACK ENGINEER

Orange, Guyancourt / Sep 2014 — Sep 2017

Managed a portfolio of Business Intelligence applications, Unix shell scripts for Hadoop clusters, and an Android app for cluster management.

MACHINE LEARNING & AI

Deep, hands-on deep learning practice: rebuilt a GPT-3-style LLM from scratch (tokenizer, multi-head attention, Transformer architecture, training loop). Designs

agentic architectures with a custom harness (Hermès project), heavy automation via Claude Code and Hermès, and deploys local models (Ollama, LM Studio).

EDUCATION

ENGINEERING DEGREE, INFORMATION SYSTEMS

Conservatoire National des Arts et Métiers / Paris

General engineering degree specialized in information systems.

SKILLS

React / Next.js

TypeScript / Node.js

AI / LLM / Agents

Technical leadership

Architecture & scalability

DevOps & CI/CD
